Selected conference talks

My Cool Conference (2022-06-08)

<https://link0.conference>

“My Cool Conference” is one of biggest developer events in Germany. It covers a vast variety of topics: starting from front-end development, and ending with mobile development and leadership skills.

Newspaper “Local CatSh*t” names it as the biggest event of Spring 2022 in Germany

(<https://localcatshit.com/link-to-the-arrticle>)

Number of in-person attendees: 1300.

Number of online attendees: 5000+.

Contact the organiser Angela Snow (angela.snow@link0.conference) for confirmation.

React Native London August 2022 [In Person & Live Stream]

• 6:30 pm - 8 pm: Finish any leftovers ;)

• 9 pm onwards: PUB!

The talks

1. Andrey Goncharov: **Headless Flipper - embeddable mobile devtools for your CI and beyond**

Flipper is a platform for debugging mobile and web apps. Half a year ago, we decided to split the electron monolith in two parts: a standalone server and a UI. In this talk, we'll cover why you need headless Flipper, as well as what opportunities it unlocks for you. We'll go over how Flipper can now easily be used for remote debugging, embedding, CI integration, etc and how we plan to use it at Meta.

React Native London June 2022 [In Person & Live Stream]

The talks

1. Marc Rousavy: **Will TurboModules replace 'JSI Modules'?**

You're probably wondering - do I still need to learn JSI when TurboModules are here? The short answer is: no. The long answer is: maybe. In this talk I will show some rare use-cases of JSI such as HostObjects, shared memory, and ArrayBuffers.

2. Vytautas Vargonas: **Animations in React Native tips and tricks**

Animations seem dreadful before you dive into this topic. With this talk I hope to get you feeling ready to pick them up and start improving your app right away. I will cover the current ecosystem of doing animations in React Native, ways to get quick wins in your app, tips on how to achieve smooth animations and potential pitfalls you may run into.
