

Open-source work

Minus Hexonalds made contributions to major open-source projects. He authohred 200 commits in total (github-link) out of which the most significant ones are:

1. Project X

The screenshot shows the GitHub repository for `cls-proxify` by `aigoncharov`. The repository is public and has 143 stars, 5 forks, and 1 issue. The main description states: "Logging on steroids with CLS and Proxy. A small library that proxies any arbitrary object with a proxy from **Continuation-Local Storage a.k.a. CLS** if found one. Super-useful for creating child loggers per each request with dynamic context from the request itself (e.g. adding request trace ID, adding request payload). Integrated with **express**, **koa**, **fastify** out-of-the-box." The repository includes a "Quick start" section with links for "Express" and "Koa". The "Install" section shows the command `> npm i cls-proxify`. The "Repository" section shows the GitHub link `github.com/aigoncharov/cls-proxify`. The "Homepage" section shows the GitHub link `github.com/aigoncharov/cls-proxify#re...`. The "Weekly Downloads" section shows a graph and the number 7,287.

2. Project Y

The screenshot shows the GitHub repository for `class-logger` by `keenondrums`. The repository is public and has 70 stars, 1 fork, and 2 issues. The main description states: "Boilerplate-free decorator-based class logging. Log method calls and creation of your class easily with the help of two decorators. No prototype mutation. Highly configurable. Built with TypeScript. Works with Node.js and in browser." The repository includes a code snippet for `@LogClass()` and `class Test`. The "Install" section shows the command `> npm i class-logger`. The "Repository" section shows the GitHub link `github.com/keenondrums/class-logger`. The "Homepage" section shows the GitHub link `github.com/keenondrums/class-logger#...`. The "Weekly Downloads" section shows a graph and the number 742.
